CURRICULUM VITAE

Soungchul Cha Ph.D.

PRESENT TITLE

Primary Appointment
Staff Scientist, Toni Stephenson Lymphoma Center, Beckman Research Institute of the City of Hope.

CITIZENSHIP

USA

Phone: 281-413-2232
Email: soungchul@gmail.com

OFFICE ADDRESS

City of Hope National Medical Center
1500 E. Duarte road
Beckman building, room 2310
Duarte, CA 91010-3000
Phone: 626-218-2950
Email: socha@coh.org

PROFESSIONAL SUMMARY

Accomplished immunologist and translational scientist with over two decades of experience in cancer vaccine development, immune monitoring, and T cell–based immunotherapies. Currently a Staff Scientist at City of Hope, leading the development of novel immuno-monitoring platforms and neoantigen-based immune profiling tools to support early-phase clinical trials in hematologic malignancies. Notably led immune monitoring for a randomized Phase II clinical trial involving idiotype vaccination and autologous T cell transfer in multiple myeloma.
Previously served as Assistant Professor and Instructor at MD Anderson Cancer Center, where I contributed to the full clinical translation of personalized DNA vaccines, including antigen identification, plasmid construct generation, and SOP development under GMP-compliant workflows. Developed methodologies for neoantigen identification, antigen-specific TCR discovery, and functional immune profiling of engineered T cells.
Expertise spans immunoassay development, translational oncology, neoantigen pipeline design, TCR discovery, and CAR-T cell characterization. Strong record of interdisciplinary collaboration across bioinformatics, genomics, regulatory affairs, and clinical operations. Committed mentor and scientific leader with a consistent focus on innovation and clinical impact.

EDUCATION

Degree-Granting Education

Konkuk University, Seoul, Korea, Republic of, PHD, 1999, PhD

Postgraduate Training

Visiting Fellow, NIH/NCI, Frederick, MD, 1999

Visiting Fellow, Department of Agriculture, Diet Genomics and Immunology Laboratory, USDA, BHNRC, Beltsville, MD, 1999−2000

Visiting Fellow, NIH/NCI, Frederick, MD, 2000−2004

SERVICE

Academic Appointments

Instructor, Department of Lymphoma/Myeloma - Research, Division of Cancer Medicine, The University of Texas M. D. Anderson Cancer Center, Houston, TX, 5/2004−2008

Assistant Professor, of Lymphoma/Myeloma - Research, Division of Cancer Medicine, The University of Texas M. D. Anderson Cancer Center, Houston, TX, 6/2008 – 10/2017.

Staff Scientist, of Beckman Research Institute of City of Hope, Duarte, CA 11/2017-

Industry Consultantships and Scientific Advisory Board

PEPROMENE Bio, Irvine, CA, Consultant, 3/2020-present.
RENHAIM THERAPEUTICS. Gyeonggi-do, Korea, Scientific Advisory Board, 7/2024 – 7/2025
PROGENEER. Seoul, Korea, Scientific Advisory Board, 7/2025 – present.

RESEARCH

Grants and Contracts

Funded

Co-investigator, BAFF-R CAR T cell therapy for ALL.; 5R01CA269569-03 , 2022-

Completed

Principal Investigator, Discovering novel lymphoma antigens as targets for immunotherapy, Ladies Leukemia League Inc., Golf South Region, 2005−2006 ($25,000/year)

Co-Investigator, Antigen ligands of the B-cell receptor of human follicular lymphoma, M D Anderson Cance Center, 2006−2007 ($50,000/year)

Co-Investigator, Self-Antigen dependence of chronic active B cell receptor signaling in the activated B cell type of Diffuse Large B Cell Lymphoma. CPRIT RP100695, 05/01/10 to 04/30/13 ($312,412/per year)

Co-Investigator, Role of B cell antigen receptor for mantle cell lymphoma , The Leukemia & Lymphoma Society, Translational Research Program, 179533, 2010-2012, ($ 200,000/ per year)

Principal investigator, Role of B cell antigen receptor for mantle cell lymphoma , The Leukemia & Lymphoma Society, Translational Research Program, 179533, 2012-2013, ($ 200,000/ per year)

Co-Investigator, Antitumor and immune microenvironment responses following a first-in-human DNA fusion vaccine for asymptomatic lymphoplasmacytic lymphoma, International Waldenstroms Macroglobulinemia Foundation - Leukemia & Lymphoma Society, 10/2017-9/2020

Co-Investigator, Discovery of immune biomarkers that predict response to a novel chimeric immune-oncolytic virus encoding anti-PD-L1 in gastric cancer peritoneal carcinomatosis.; DoD E01 Award, 2019-2021.

Patents and Technology Licenses

Patents

WO0215048748 A1
MYELOID-DERIVED SUPPRESSOR CELL-SPECIFIC PEPTIDES FOR DIAGNOSTIC AND THERAPEUTIC USE. September 30, 2013

Provisional Patent
Application number: 6311259; EFS ID: 41100013
SARS-COV-2 DNA VACCINE. November 11, 2020
